Bruning Encourages Bone Marrow Donation Awareness Day Participation

LINCOLN – Attorney General Jon Bruning issued the following statement on the Bone Marrow Donation Awareness Day initiative launched by the Nebraska Huskers basketball program for this weekend’s game against Minnesota on Sunday, January 26, 2014.

“I hope all Nebraska fans will take part in this effort to support cancer research and increase awareness about the bone marrow registry,” said Bruning. “Participation in the registry is easy – and it saves lives.”

Bone Marrow Awareness Day activities will be coordinated at this Sunday’s basketball game through a partnership between the Nebraska basketball program and the American Cancer Society. Fans can sign up for the bone marrow registry, receive match kits/swabs and take the test to be a potential bone marrow match. Volunteers will be on hand throughout the event.
